To: Software Recruiter
HashiCorp
Los Angeles, CA, US

Dear Recruiter,

I am **Huan-Yu (Henry) Chang**, a current sophomore at UCLA pursuing a degree in Computer Science. I am writing to indicate my interest and qualification for the **2020 Software Engineering Internship**.

To start, I am especially drawn to the security and networking aspect HashiCorp's Vault and Boundary product. Their applications are especially relevant in the remote workstyle of 2020. I believe working on them will allow me to pursue my interests in both **security and networking**.

For my qualification, not only have I excelled in all of my CS classes, I am also an officer for the **UCLA ACM CYBER**. I gained experience with tools and languages such as C++, AWS, Docker, NodeJS, the MERN stack and many more during my time. Furthermore, as a cyber officer, I give workshops and write security related problems at least twice a quarter on topics such as RSA, Packet Capture, and XSS. Lastly, I interned with a fast-paced startup **Alcatara** over the summer. I was able to thrive and implement impactful changes (more details in my resume). They later hired me for the school year.

On a final note, I am currently residing in Birmingham, Alabama due to the pandemic, but I will gladly relocate if remote work is not offered. I hope the above showcases my qualification for the position, and I thank you for looking over my application.

Sincerely,

Huan-Yu Chang
